Mid-Interval Assessments (MIA) may be requested by state programs that do not attain 10/10 Conformance status on their Final Assessment Report.

The MIA will occur at specific timeframes throughout the year, based upon Audit Staff availability.

MIA maybe conducted using web-based technologies when feasible.

Criteria to request a MIA:

- The state program submits a written request for an MIA. Email will suffice.
- The state program must currently have Conformance in at least 7 of the 10 standards.
- The MIA is limited to the standards not in conformance during the most recent on-site.
- Division of Standards Implementation (DSI) must be in concurrence (prior to AS scheduling an MIA) that the corrective actions submitted by the state program are sufficient to reach conformance in the requested standards.
- One MIA may be requested in the 2-year period between routine on-site assessments, post Interval 3 and may not be requested within 6 months before or after a routine assessment.
- State programs must provide conclusive evidence that conformance is based on a minimum 90-day period of use.
